WORK EXPERIENCE

Front-End Developer

Arrow Smart Solutions (Start-up), March 2024 - Present

- Developed websites optimized for SEO and integrated with Google Analytics for detailed user behaviour tracking.
- Resolved navigation, overflow and device response issues for websites, significantly improving user satisfaction and reducing customer support inquiries for businesses.
- Implemented the use of Miro as the primary UX/UI design tool, migrating from Figma, optimizing workflow and team collaboration.
- Improved productivity by over 20% by streamlining ideation, wireframing, and design iteration processes.

Help Desk - Network Support

Webhelp, December 2020 - February 2022

- Resolved software and network issues for end-users, improving system uptime and business operations.
- Integrated ticketing system enhancements, improving response tracking and boosting team productivity.
- Trained end-users on best practices, reducing IT-related support requests by over 10%.
